The power of frozen water is singularly illustrated in a lecture on heat and cold, delivered by Professor Tyndall, before the Royal Institution of Great Britain. Among his experiments, an ordinary bomb-shell was filled with water, securely plugged, and then placed in a bucket filled with pounded ice and salt. In half an hour the bomb-shell was burst into fragments by the mere freezing of the confined water.

The number of the sovereigns of Europe is thirty-eight, viz: Three emperors, the Sultan, the Pope, ten kings, two queens, six grand-dukes, five dukes and ten princes. The oldest of these is the Pope, who is seventy-five. After him come the King of Prussia and the Duke of Anhalt, both of whom are over seventy.

Pittsburg is to be the goal of a young lady of New Lisbon, Ohio. She is to walk there in thirty consecutive hours, for a purse of \$500. She is said to be an old maid, and, to keep her up to her work, a young man is to walk before, holding out a promise of marriage when the feat is accomplished.

PLEASANT COUNTRY.—The Cheyenne vigilance committee advertises that persons will be notified through the newspapers to leave the Territory, and if said persons do not leave within twenty-four hours, the committee will not be responsible for their safety.

Gov. Pense, of Texas, affirms that more than 100 homicides have been committed in Texas during the last twelve months.

Marquez escaped from the city of Mexico, in the disguise of a charcoal dealer, with the help of \$10,000 in bribes.

A Boston detective gives his whole attention to the thieves who steal newspapers from door steps.
